

## THIRTY-FIVE INTERESTED APPLICANTS FOR 18 OPEN TRAINING POSITIONS- AUTOBODY

Mohawk College in Hamilton's recent venture into more pre-apprenticeship training appears to be on the right track !

On February 27, 2018, an interested group of potential autobody and collision damage repair techs attended the 7 pm opening of a information night at the Stoney Creek campus.

After hearing presentations from industry and association staff on the hiring marketplace and income potential, students asked a number of questions and then many signed up for the program's first interview process.

On October 12, 2018, the industry can look forward to further 18 students being able to work full-time at local repair facilities as they move their way to a Level 2 training professionalism.
