

Join Mike Anderson and Nissan for a FREE webinar

"Learn to Research, Research to Learn"

Monday April 23rd @ 2pm Eastern

This is the third of a new monthly series of free webinars that trainer and consultant Mike Anderson of Collision Advice is hosting throughout 2018 to help you easily research and find collision repair procedures.

This month's "Learn to Research, Research to Learn" will focus on

Nissan's Technical Information System

In these webinars, Mike will focus on a different automaker each month, walking you through the process of using that OEM's specific website to locate the repair procedures, information and position statements you need! You will have an opportunity to text in questions during the live webinar.

Once you understand the automakers' websites and begin using them, it becomes a much faster and easier process, and these webinars will help you do that!

Don't miss this free webinar! [Click here to register!](#)

1

This webinar will be computer/app audio only - you will not be able to dial into this webinar via phone.

You do have the option to view the webinar at a later date but please still register so you can receive the link.

Collision Advice is a full-service training and consulting firm offering collision repair businesses of all sizes assistance with virtually every aspect of business management and production, including estimating, SOP development, lean principles, accounting, sales and marketing, customer service, negotiating, workforce development, websites and social marketing. It was founded by Mike Anderson in 2010, following the sale of his collision repair businesses that he operated in Alexandria, Va., for more than 20 years.

"To represent the best interests of the industry, providing opportunities for growth for environmentally sound, profitable businesses, having trained professionals serving the public"
